LAKSHAY MANCHANDA

AI/ML & Software Engineering | Data & GenAI

lakshaymanchanda574@gmail.com | +91 9306595652 | LinkedIn | GitHub | LeetCode | Portfolio | Karnal, Haryana, India

EDUCATION

Pursuing BTech in Computer Science and Engineering (Spec. AI & ML) — UPES, Dehradun **2024 – 2028**

CGPA 8.57/10 through 4th semester | Class XII: 77% | Class X: 96.8%

TECHNICAL SKILLS

Languages: Python, SQL, Java, TypeScript, JavaScript

Data & AI: Pandas, NumPy, Scikit-learn, GenAI, LLM (Google Gemini API), Prompting / Prompt Engineering, Embeddings, Retrieval-Augmented Generation (RAG), LLM Orchestration, Agentic AI, AI Agents (Tool Calling), Deep Learning

Databases: PostgreSQL, MySQL, Prisma ORM, Vector Databases (Pinecone)

Backend & APIs: REST APIs, Spring Boot, Node.js, Express, Next.js API Routes, JSON

Web Development: React, Next.js, React Native

Tools & Practices: Version Control (Git, GitHub), GitLab CI/CD, AI Coding Assistants (Claude Code, Antigravity, ChatGPT/Codex), Vercel, Agile/Scrum, Data Structures (100+ LeetCode problems, Java), DBMS

WORK EXPERIENCE

Software Engineer Intern — NIIT Limited Jun 2026 – Aug 2026 | Gurugram, India (On-site)

- Built Java/Spring Boot REST APIs and the React front end for an enterprise LMS used by corporate workforce clients, including the multi-tenant dashboard, program/series pages and user profile.
- Implemented clickstream event tracking and an interactive onboarding tour, giving the product team real usage data on how new users engaged with the platform.
- Worked within GitLab CI/CD workflows using Git version control, pushing code through pipelines across dev, migration, testing and main branches so changes were tested before reaching main.
- Contributed to an AI roleplay simulation feature used for workforce skills screening; built REST APIs for the daily 'Thought of the Day' module.
- Built a gamified learning-journey view (streaks, milestones, progress tracking) and in-app PDF, SCORM and video viewers so learners can finish content inside the platform.

React & React Native Developer Intern — Frintt Stuudio Pvt. Ltd Nov 2025 – Mar 2026 | Remote

- Built responsive frontend panels for the Back&Bone web app and the matching screens on the mobile app.
- Integrated REST APIs to surface real-time performance and biometric activity-tracking data in the Back&Bone web and mobile apps.
- Built a shared library of 20+ reusable UI components used across web and mobile to keep the experience consistent.

PROJECTS

Ultimate CS Career Architect — AI Resume Audit Engine (Live) Mar 2026 – Present

- Built a full-stack AI career platform with a 3-layer resume audit (ATS score 0–100, specialization alignment, bullet-level impact) on the Google Gemini API.
- Developed a supervised agentic AI agent for career planning: a bounded multi-turn loop (max 3 planning turns, 4 tool calls) using whitelisted tools over user-scoped Prisma/PostgreSQL data, with prompt-injection guardrails and a human approval gate before any database write.
- Built a multi-provider LLM failover router (Gemini, Groq, OpenRouter, Mistral, Cerebras) with structured JSON output, JSON repair and exponential backoff.
- Added LLM-based mock interviews, AI project suggestions with Mermaid architecture diagrams and a Kanban job tracker (NextAuth-secured).

Tech: *Next.js, TypeScript, Google Gemini API, Prisma, PostgreSQL, NextAuth, Mermaid, Vercel*

SaralYojna — Government Scheme Discovery Platform (Live) Nov 2025 – Feb 2026

- Built a civic-tech platform that helps users discover the government schemes they are eligible for, across a dataset of 500+ Indian schemes.
- Implemented semantic search over the eligibility criteria of all 500+ schemes using a Pinecone vector database, replacing rigid keyword filters with meaning-based retrieval; exposed through Node.js/Express (TypeScript) APIs.

Tech: *React, Node.js, Express, TypeScript, Prisma, Pinecone (Vector Database)*

Enterprise LMS Platform Modules (Client Deployment) Jun 2026 – Aug 2026

- Built enterprise LMS modules (dashboard, content catalog, daily engagement features) used directly by client workforce staff, including LLM-based conversational AI roleplay characters built with prompt-engineering schemas.

Tech: *Java, React, REST APIs, JSON Serialization*

Dungeon Escape: Cardbound — Desktop Game Feb 2026 – Apr 2026

- Implemented A* pathfinding with a Manhattan heuristic and wall-adjacency costs to drive enemy movement (Java, LibGDX).
- Wrote custom GLSL fragment shaders to render dynamic radial lighting and falloff effects in real time.

AWARDS & ACHIEVEMENTS

- **Smart India Hackathon (SIH) 2025 — Internal College Finalist & Team Lead:** led a 6-member team building cross-lingual clinical conversational screening models.

Languages: English, Hindi (fluent)
